Subject: Fw: Revised statement

Pls review this draft from Melissa which puts it in the required format and includes the info you all just gave us. W will have to change the direction for the data release to include only these four stations and 3 dates, correct?

Subject: Revised statement

Team: for purposes of this interpretative statement to go out today, we have narrowed our focus to just the four stations, and solely the fully validated data of Aug 7 to 9. Gerry, please confirm the accuracy of what we have drafted – please reply asap...in particular, please confirm that for Aug 7, 8 and 9 at the four stations (SJLP, SJFP, SJHP and SJSR) we have no metals exceedances...or correct this.

Next steps: Tuesday we can have validated data from the Aug 10, 11 and 12 analyses and draw conclusions.

Deliberative Process/Ex. 5

Deliberative Process/Ex. 5

Jared: next steps – Gerry Hiatt will continue to refine the data analysis this weekend with input from Water Division's Janet Hashimoto, feeding this to Harry Allen and Enrique. Enrique will task Ned Black with doing same for the agricultural risk-screening level data. Gerry will send tabular data he has to the team. Enrique notes via Clancy the validated data will be uploaded by the JIC in due course, so this (above) is the sole interpretive statement thus far, and begs the NN interest in agricultural uses of the water. **Please ensure on the Aug 7,8 and 9 fully validated data is the only data uploaded to the JIC today. Thanks all.**
